Greetings,

I am writing to voice my opposition to siting a national high level nuclear waste dump at Yucca Mountain for the following reasons:

- the area is unsuitable because it is in an earthquake area and it already has been found to be leaking water.
- it is situated on the sacred land of the Western Shoshone, and putting this facility there would be like using Mt. Rushmore for a similar purpose.
- the transportation of the high level nuclear waste would put the entire nation at risk of a serious nuclear accident or attack.
- the real solution is to de-nuclearize out society and keep the high level radwaste at the facilities that produce it until a scientifically benign solution is found. ]

Sincerely yours, Michael Steinberg
